Claims rejection

The amended abstract and specification have been acknowledged and approved. However, the applicant must submit a replacement free of canceled and replaced elements in response to this action.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Said connecting position in claims 11 and 12 is undefined because there is nothing in the claims that indicates what said connection position is about. It is undefined as to what said connection position relates to. There have to be at least two elements to connect if there is a connecting position on a plane. The claims, however, fail to identify the relevant elements in the overall wiring structure directly related to said position.

Claims 1-10 have been allowed.
